1. MEET YOUR SMART AIR PURIFIER

INSIDE THE BOX

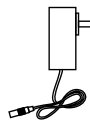

Hello
Smart
Air Purifier

Compound
activated
carbon filter
(pre-installed)

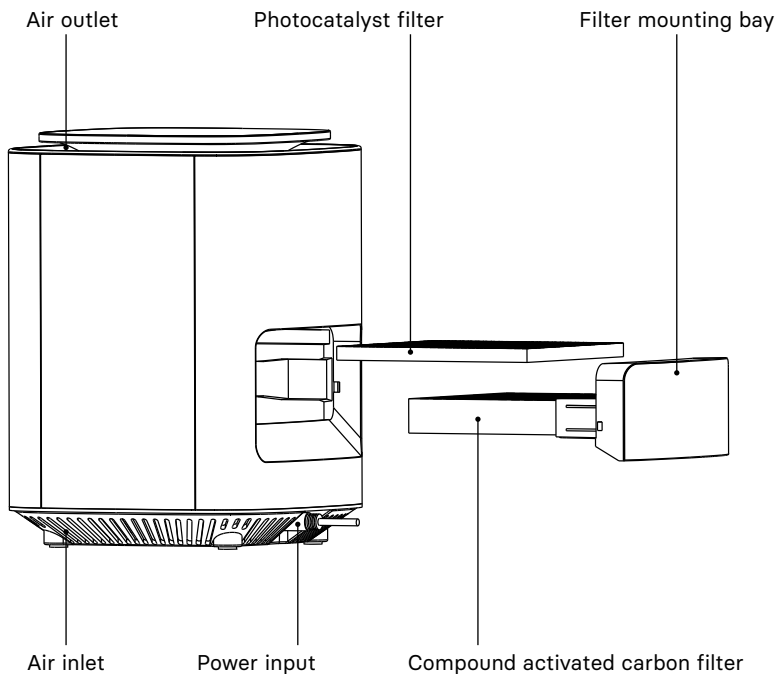

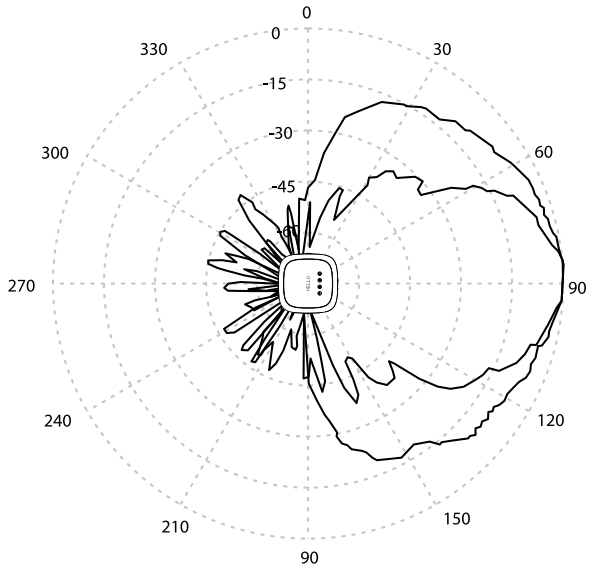

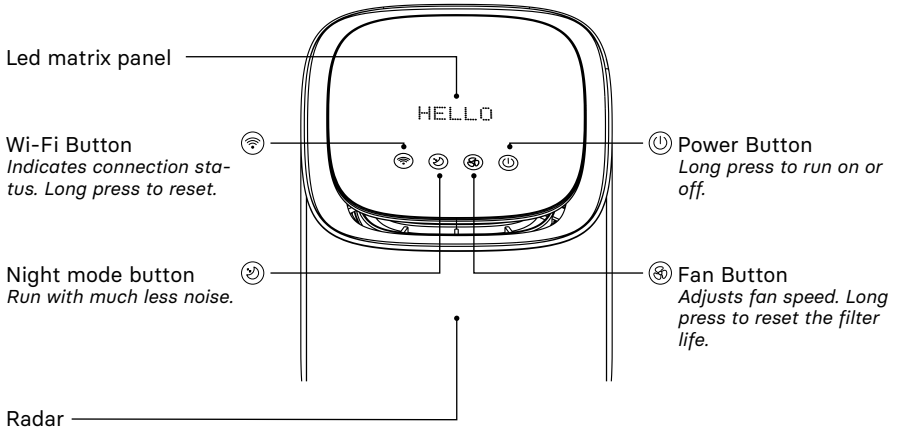

Photocatalyst
filter
(pre-installed)

12V 2 A
power cord

HELLO COMPONENTS

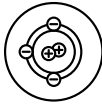

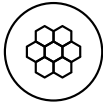

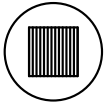

Surveillance range by the radar.

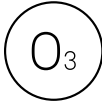

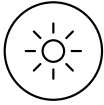

2. HOW IT WORKS

INSIDE THE BOX

PURIFIES THE AIR

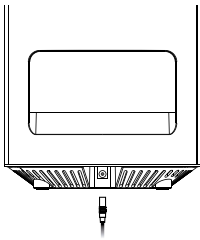

- 2 in 1 compound filter captures 99% of dust, pollen, pet dander and odors.
- An ionizer producing negative ions in an environment quickly reduced airborne dust.

DESTROYS GERMS & BACTERIA

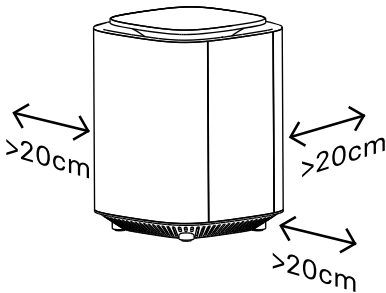

- The UV-C light is purifying the inside of the purifier and killing germs and molds trapped in the compound filters.
- Photocatalytic filter breaks down volatile organic compounds (VOC's) or odors in gas form into carbon dioxide and water.
- Ozone generated by the purifier will kill mold and remove any odor with ozone oxidation.

3. OPERATIONS

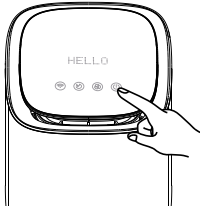

1. CONNECT THE POWER

Unbox and connect the power cord to the purifier. Then connect it to the wall outlet.

2. POSITIONING

Ensure the air filter is properly positioned in the purifier. Allow enough clearance on all of the purifier for best performance.

4. QUICK SETUP & FACTORY RESET

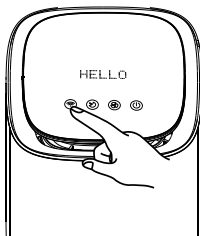

1. Download the Hello Smart Air Purifier App, which is available on App Store and Google Play. Click Sign up to get walked through to create your Hello account.
2. Power on and ensure the Wi-Fi indicator button is blinking fast, reflecting the device is ready for joining the Wi-Fi.
3. Open the Hello Smart Air Purifier App and click the "+" button and get walked through the setup steps.

7

ATTENTION:

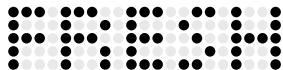

1. The system does not support the 5GHz Wi-Fi, please make sure your Wi-Fi is 2.4GHz.
2. If Wi-Fi indicator is not blinking fast after power on, please long press and hold the Wi-Fi button until the indicator blinks quickly.

FACTORY RESET

Long press Wi-Fi button for 5 seconds until it blinks fast, reflecting it has been restored to factory setting.

5. WORK MODES

FRESH MODE

Run with photocatalyst filter, negative ion, UV-C working, and fan at adjustable levels (default: level 3).

NIGHT MODE

Run only with photocatalyst filter working at fan level 1.

AWAY MODE (60 minutes)

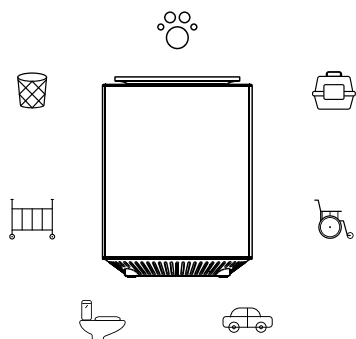

Run with photocatalyst filter, negative ion, UV-C, ozone emits (30 minutes) and fan at level 5.

SAFETY LOCK

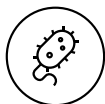

The safety locks prevents children or pets from accidental touching.

6. AWAY MODE

The AWAY mode is used where strong deodorization is required. In this mode, in addition to the full working of the photocatalyst filter, the purifier also emits a little quantity of ozone.

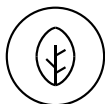

This mode works for 1 hour and ozone is emitted for half an hour. The purifier will return to fresh mode after 1 hour.

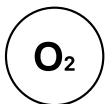

Sterilizing

Sanitization

Odor removing

Non secondary
pollution

Radar detector

OZONE

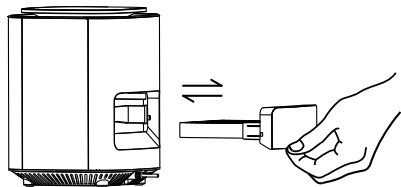

Ozone is widely found in nature and is a layer to protect our earth. It has a strong ability to kill odors, bacteria, etc., and the sanitization can be spread throughout the space in a short time without hindrance or dead corners.

Ozone is an unstable molecule and over time will decompose into O_2 and a free oxygen.

Excessive ozone is irritating to the respiratory tract of humans and animals. To avoid harm, ensure people or animals leave the space before you initiate the away mode. Only re-enter the area in one hour after the App counts down.

Additionally the purifier has an integrated high-sensitivity radar detector. In AWAY mode, when the radar detects that an object is moving nearby, the purifier immediately stops emitting ozone and switches to FRESH mode.

7. MAINTENANCE

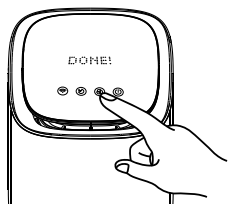

9

0 1 2 3 4 5 6 7 8 9

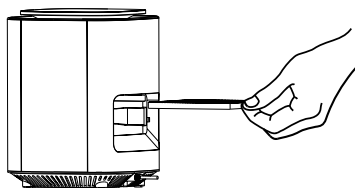

Hello Smart Air Purifier will remind you to clean the compound activated carbon filter every other month. Please clean or replace the new filter as appropriate.

> It is recommended to replace filter every 3 months.

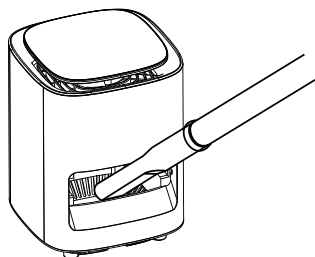

RESET DONE!

After cleaning or replacing the filter, please press and hold the FAN button until RESET... DONE! appears on the display or operate the filter resetting on the App.

REPLACING THE PHOTOCATALYST FILTER

As photocatalyst activity will decrease significantly after one year, the App will remind you to replace after one year. Please contact your seller to purchase and replace.

CLEANING THE PURIFIER

For better ventilation and purifying, use a vacuum cleaner or gently wipe with a soft cloth.

ATTENTION: Be sure to power off the purifier before performing the above operations.

8. SPECIFICATIONS

MODEL: Hello Smart Air Purifier

COVERAGE: 15 m²

DIMENSIONS (IN MM): 180x180x240

POWER INPUT: 12V-2A

COMMUNICATION: Wi-Fi (2.4 GHz)

WEIGHT: 1,4 kg

9. WARNINGS

1. Please use it in the indoor environment.
2. Puppies like to catch bites. Please pay attention to power cord protection.
3. Touch panel is tempered glass and there is a risk of chipping when dropped. Place the purifier on a flat surface.
4. Do not disassemble yourself.
5. In the AWAY mode, please wait for the ozone to decompose and last the 60 minutes cycle before entering the room.

10. WARRANTY TERMS

PRODUCT

DATE OF MANUFACTURE

DATE OF PURCHASE

CUSTOMER'S NAME

DEALER'S NAME

The distributor guarantees the equipment for a period of two years in the event of any non-compliance detected in the equipment, in accordance with Royal Decree 1/2007 of 16 November (revised text of the General Law for the Defence of Consumers and Users).

- The guarantee includes the repair and replacement of faulty parts by personnel authorised by the distributor or by the official technical assistance service (S.A.T.) at the place of installation or in its workshops. Included in the warranty is labor and shipping costs that may be generated.
- The distributor is exonerated from providing a guarantee in the case of parts subject to natural wear, lack of maintenance, blows or other nonconformities resulting from improper use of the equipment or inadequate according to the conditions and operating limits indicated by the manufacturer of the same. Likewise, the warranty becomes ineffective in cases of improper handling and use of the equipment or in those cases in which they have been modified or repaired by personnel outside the distribution company or official S.A.T..
- The parts replaced under warranty will remain the property of the distributor.
- The distributor is responsible for the lack of conformity of the equipment when it refers to the origin, identity or suitability of the products, according to their nature and purpose.
- For any warranty claim it is necessary to present the purchase invoice. The period of two years is calculated from the purchase of the equipment from the distributor.
- If there is a problem with your equipment during the warranty period, please contact your dealer.
